Abstract (en)

[origin: WO2009141218A1] The invention relates to a washing machine comprising a liquor container (1), in which a washing drum (3) is disposed in a rotating manner and which is connected to a discharge line (5), and further comprising a storage container (7) having a flow connection to the liquor container (1) via a return line (9), rinsing fluid being stored in said storage container for renewed feeding. According to the invention, the return line (9) is branched off from the discharge line (5) downstream of the liquor container (1).
