Abstract (en)
[origin: WO2009133002A2] The invention relates to a refrigeration device which comprises a carcass (2) and a door (1) which surround a cooled interior space and which have wall surfaces (3; 7) that face each other and that define a gap filled with a seal (10). A recess (11) bridging the seal (10) is formed into at least one of the wall surfaces (7). A valve assembly (12) having an inlet (16) and an outlet (17) is inserted into the recess (11) on different sides of the seal (10).
