Abstract (en)

[origin: EP2283745A2] The extraction device has multiple guide rails attached to each other. A segment adjustment device (13) having a pivoting lever (14) and a carrier is provided between the guide rails. The lever of the segment adjustment device is provided with two contact surfaces formed as curved paths. The relative speed of the guiderail is changeable against the guiderail over the contact surface of the lever.
