Abstract (en)
[origin: EP2283765A2] The dishwasher (1) has guiding units e.g. guide rails (5, 6) or guide bars, connecting a rinsing good pullout (4) and a floor (8). The floor is assigned to the pullout and provided for rinsing goods e.g. kitchen utensils, cutlery and/or containers, to be arranged in the dishwasher. The guiding units hold a storing surface (9) of the floor during movement of the floor from a working position into a loading position and vice versa by continuous orientation. The guiding units exhibit an axis running vertically in a usage position of the dishwasher.
