Abstract (en)  
The source has a set of individual illumination sources emitting light with dominant wave length, and an optical unit with a reflector and/or a beam divider heterodyning the emitted light. The reflector is mounted and designed, such that the emitted light of the individual light source is reflected and strike heterodyned with the emitted light of another individual light source on an object field. The beam divider is mounted and designed, such that the emitted light of the former light source is reflected on the object field.

Abstract (de)  
Eine Trockner-Lichtquelle (1), bei welcher das Licht einer Mehrzahl von Einzellichtquellen (3) mit Hilfe von optischen Elementen (6, 4, 7, 8) überlagert und gebündelt auf eine Objektebene (5) gebracht wird.
