Abstract (en)
[origin: EP2284020A2] The container e.g. filing folder (10), has an outer hull comprising a front cover (12) and a back cover (14) that is integrally connected with the front cover. The outer hull comprises recesses (20, 26), and reinforcement elements (28, 30) are arranged on a circumferential edge of the recesses and made of paper mache. The reinforcement elements and the outer hull are made of same material, and rubber bands are provided for fixing the front cover at the back cover. A file mechanism is fastened to the back cover, and a file spine (16) connects the front cover and the back cover.
