Abstract (en)
The present invention relates to a dispensing container (1,21). The dispensing container (1,21) according to the invention comprises a flexible wall (2,22) which encloses an internal space (3,23), a dispensing opening (5,25) in the flexible wall (2,22) which is in communication with the internal space (3,23), and pulling means (6,26,34) which can be operated from outside the internal space (3,23), wherein the pulling means (6,26,34) extend between a part of the flexible wall (2,22) remote from the dispensing opening (5,25) and the dispensing opening (5,25), and at least during use are in engagement with a part of the flexible wall (2,22).
