Abstract (en)
[origin: EP2284094A1] The object of this invention is a multiple bottle holder (1) which permits bottles to be affixed to the holder in order to be carried from one place to another due to apertures (1.1) which permit the insertion of the bottle (2) neck (2.1), preventing said bottle (2) from coming out of the aperture (1.1) as a result of its own weight, in addition to which the holder (1) may be stored on another lower holder and thus successively until a stack of holders is built up.
