Abstract (en)
[origin: EP2284103A1] The device has an external handling bag (2), and a cover including an internal bag (3) constituted by an anti-perforation material i.e. non laminated polypropylene body sheet, for receiving embedding products. The cover includes an intermediate bag (4) made of a material i.e. polypropylene, to ensure vacuum sealing between the internal bag and the external bag. The intermediate bag includes sealed closing units presented in the form of a vacuum valve. The internal bag includes lifting units presented in form of straps (6).
