Abstract (en)

[origin: EP2284301A1] A cleaning device 61 for a front bottom roller 28 includes a pad supporting lever 70, a fixed member 90, a first torsion spring, and a pressing lever 31. The pad supporting lever 70 supports a pad body 62. The pad supporting lever 70 is mounted on the fixed member 90 in a manner that the pad supporting lever 70 can be swung. The first torsion spring is mounted on the fixed member 90 and applies force to swing the pad supporting lever 70 in a direction in which the pad body 62 is made into contact with an outer peripheral surface of the front bottom roller 28. By moving away from the front bottom roller 28, the pressing lever 31 applies force to swing the pad supporting lever 70 in a direction in which the pad body 62 moves away from the outer peripheral surface of the front bottom roller 28.
