Abstract (en)

[origin: EP2284350A2] The device has a runoff profile (7) mounted on a U-shaped heat shield forming profile (5) so as to form a cover for the heat shield forming profile. A longitudinal edge of the cover extends to certain distance from the heat shield forming profile for forming a longitudinal evacuation opening (9) for evacuation of runoff water. The runoff profile has a T-shaped section whose vertical part assures connection with the heat shield forming profile.
