Abstract (en)
The present invention provides a cooling device (100) for a gas compressor (202), which significantly simplifies the ease of maintenance. The cooling device (100) for cooling the gas compressor (202) comprises a cooling arrangement (102) to cool a cooling medium (104). The cooling device (100) has got interfaces, which makes it attachable or detachable from the gas compressor (202). The cooling device (100) has a first interface (110) for receiving the cooling medium (104) from the gas compressor (202) and a first valve (112) for controlling the flow of cooling medium (104) through the first interface (110). The cooling device (100) also has a second interface (114) for supplying the cooled cooling medium (104) from the cooling arrangement (102) to the gas compressor (202) and a second valve (116) for controlling the flow of cooling medium (104) through the second interface (114).
