Abstract (en)  
[origin: EP2284807A1] The device has bill containers (12a,12b,12c,12d) has storage elements (14a,14b,14c,14d), where bill individual characteristics of each bill and the sequence of the bills are stored within the bill container. The control unit (26) compares the detected bill individual characteristics with the bills individual characteristics stored in the storage element. An independent claim is also included for a method for the payment of bills.
