Abstract (en)

One, or more client machines may engage in the play of reel-type games with a gaming server, where each gaming session may include one or more spins of a reel in the reel-type game. Certain outcomes of these spins may include a bonus token, or some other type of indication that bonus credits have been awarded. Once a given client machine has accumulated a sufficient number of bonus tokens, the client machine may have the option to engage in a bonus game.
