Abstract (en)

[origin: WO2009124703A1] The invention relates to a packaging film (1), in particular for producing a packaging (13), having at least one packaging-film section (3), having a single-layer or multiple-layer substrate (8), a functional layer (5) which is printed on, is formed from a printable material, at least in sections, forms an outermost layer of the packaging-film section (3) and is configured in such a way that it has properties which are anti-microbial and/or oxygen-trapping. There is provision according to the invention for that section of the functional layer (5) which forms an outer layer of the packaging-film section (3) or the entire functional layer (5) which forms an outer layer of the packaging-film section (3) to be arranged on an outer side (2) of the packaging-film section (3), at least in sections, in a region (6) which is enclosed by an annular sealing surface (4). Furthermore, the invention relates to a packaging (13) and to a packaging/product unit.
