Abstract (en)

[origin: WO2009135535A1] The invention relates to a roll cleaning device (13) of a printing machine, comprising a rotatably mounted doctor roll (14) that is disposed at a roll (22) during the wiping process, and a wiper (17) that can be disposed at the doctor roll (14), wherein the doctor roll (14) has a separate rotational drive (23). The rotational drive (23) comprises an electric motor (23).
