Abstract (en)

[origin: WO2009148392A1] A connecting mechanism that connects two vehicles or vehicle parts, e.g., an accordion bus, the connecting mechanism including two crossed link arms, each of which is connected at a first end to a first vehicle or vehicle part and linked at another end to another vehicle or vehicle part, and damping means to damp the connecting mechanisms, where each of the link arms has a longitudinal hollow cavity with enclosing material that encloses the area, and the enclosing set of material has a smaller area than the hole in cross-section, preferably half as large, even more preferably one third as large or less.
