Abstract (en)

[origin: WO2009141841A1] The machine comprises: a transport system (3) for transporting the fabric (T); at least one impact structure (5A, 5B) arranged in front of one end of the transport system for transporting the fabric; an accumulation area (17A, 17B) of the fabric associated to the impact structure. In the transport system blowing members (51 B) are provided so as to generate a support air flow from the bottom towards the fabric, in order to support the fabric during the motion along the transport system (3).
