Abstract (en)
[origin: WO2009122305A2] The invention relates to a fastener for fastening glass panes in a frame construction made of wood or plastic, wherein the fastener is characterized by the following elements: a retaining rail 4 made of an elastic plastic that can be fastened to the wooden or plastic frame 2, a clip strip 5 that can be attached to the retaining rail 4 and an elastic sealing arrangement 6, wherein the retaining rail 4 comprises a fastening side 7 with a clip claw 8 that can connect to the wooden or plastic frame 2 by way of fastening elements, a clamp side 9 that is at a distance away from the fastening side 7 and wherein the clip strip 5 comprises a clip claw notch 10 that is disposed and geometrically designed such that the clip claw 8 latches into the clip claw notch 10 in the connected state in shape-locked fashion and comprises a clamp side notch 11 that is disposed and geometrically designed such that the clamp side 9 engages into the clamp side notch 11 in force-locked or form-locked fashion.
