Abstract (en)
[origin: WO2009149843A1] The invention relates to a motor vehicle comprising an engine (MO), an accelerator pedal (FP) for requesting engine power, a storage device (SPE) for storing information on the dependency of the preferred, especially optimum engine operating range, especially engine operating point, of the engine speed, a display device (ANZ) and a control device (STE) that is designed and coupled to the engine, the storage device (SPE) and the display device (ANZ) in such a manner that information (M) regarding the momentarily preferred engine operating range is displayed on the display device (ANZ) depending on the momentary engine speed.
