Abstract (en)
[origin: WO2009147059A2] The invention relates to a chilled goods storage compartment (10), having at least one wall, at the free edge of which a profiled element (9) is arranged, wherein the profiled element (9) can be fastened to the wall by means of an adapter piece (1) that can be fixed to said wall. The profiled element (9) is preferably a decorated strip of a door compartment (10). The adapter piece can be fixed to the wall, for example positively or non-positively. The adapter piece (1) is preferably designed in the form of a U-shaped profiled rail and at least one of the side walls (3) of the adapter piece (1) forming the limbs of the U-shaped profile has at least on the inside (5) and outside (4) thereof regions (12) that increase the friction both between the adapter piece (1) and the profiled element (9) and the adapter piece (1) and the wall of the chilled goods storage compartment (10).
