Abstract (en)  
[origin: WO2010001032A1] The invention relates to a textile complex (1) intended to be attached to a communicating panel. It is characterized in that it comprises: a textile sheet (2) having, on at least one face (3), loops (4) intended to cooperate with a self-gripping strip provided with hooks; a coating film (5) attached to a face (6) of the textile sheet (2); and a printing ink deposited on the coating film, and in that the textile complex has a capacity for preferential elastic deformation in a direction of deployment on the communicating panel. The invention also relates to a communicating panel and to a corresponding method of display.
