Abstract (en)
[origin: EP2286694A2] The system has a fastening system (2) for reversibly arranging wall plates (1) in different positions within a plane parallel to a wall (3). The fastening system modularly arranges the wall plates in different planes. The fastening system has a profiled rail (4) provided for fixing at the wall. The wall plates are suspended, moved and/or fixed in the rail. The plates are connected with the fastening system in an upper area and supported at the wall in a lower area. The plates are spaced at a distance from the wall. The wall plates have a body (7) of acrylic glass and a frame (6) of aluminum.
