Abstract (en)

This invention relates to a mounting mechanism for a balance weight (1) developed for securing a concrete weight, which is used in dishwashers and which prevents the machine from falling over ensuring that the machine stands in balance when the door and the racks are in extended position and, to a crossbar (14) provided on upper part of the basin (9) without using any connection apparatus and only by utilizing the structural properties of basin (9) and crossbar (14).
