Abstract (en)
A spinner apparatus for facilitating connection and disconnection of threaded tubulars, the spinner apparatus comprising a first roller (361) on a first arm (326) and a second roller (363) on a second arm (328), said first and second arms (326,328) movably linked to a body (312) characterised in that , a first and second piston and cylinders (320) are arranged between said first and second arms, wherein ends (320f) of said piston and cylinders meeting at a free-floating union (321), in use said piston and cylinders are activated to move said arms to move said first and second rollers into and out of engagement with a tubular to be spun.
