Abstract (en)
[origin: EP2287525A1] The light comprises multiple lights (2) and a support rail (6) which has a base profile (12). Two web sections (13) extend from the base profile, such that the support rail has U-shaped rail cross section which has an open side opposite to the base profile. A device carrier (7) has a bottom profile which closes the open side of the rail cross-section. An independent claim is also included for a light strip with multiple lights arranged one behind the other in its longitudinal direction.
