Abstract (en)

[origin: EP2287975A1] The electrical appliance (1) has a base (2) formed in the form of a flush-mounted device and mounted in a commercial flush-mounted box (18). The base has a battery charger (3) and an electrical connection (4) for an alternating current network. The front side of the base of an Universal serial bus (USB) charger connection socket (11) is provided for the connection of an USB-charging connection plug (22) of an USB-device. A mechanical on and off switch is arranged between the connection and the input of the charger device.
