Abstract (en)
[origin: WO2009146927A1] The invention relates to a packaging machine for filling bulk goods into valve bags, having a storage container provided in an upper region, and a filling device disposed underneath the same, comprising a plurality of filling nozzles. The filling device comprises a plurality of filling units, each having a filling module. The filling units are configured in a self-supporting manner, wherein a filling cup, a filling nozzle, and a conveying member are each disposed on a filling module.
