Abstract (en)

[origin: WO2009124770A2] The invention relates to a method for producing a corner of a frame-type spacer for insulating glass panels by (a) making a metal hollow profile rod (1) available, which rod has an outer wall (2), two parallel flanks (3, 4) and an inner wall (5), (b) indenting the inner wall (5) and the two flanks (3, 4) in the position of the hollow profile rod (1) where the corner is supposed to be formed, and (c) bending the hollow profile rod (1) by a defined angle.
