Abstract (en)

[origin: WO2009153118A2] The aim of the invention is to provide a locking device that can be produced in an economical manner and/or with a high production quality. Said locking device (47) for locking shift rails of a transmission comprises a locking body (48) that is configured to lock the shift rails, and a housing (5), said locking body can be displaceably mounted in the housing. Said housing (5) comprises a guiding channel (55) that is housed in the base body of the housing for guiding the locking body.
