Abstract (en)

[origin: WO2009149994A1] The invention solves the problem of providing a method for producing, allocating and checking authorization approvals which are necessary for tasks which are predefined by an engagement schedule to be performed by a service technician by means of actions which are defined by the tasks on a piece of equipment or a component of a distributed structure. The present invention solves this problem by permitting flying generation and distribution of authorization approvals for service technicians, as a function of necessary actions or measures which are to be performed in the form of tasks as part of an engagement schedule which is contained or recorded in a work schedule.
