Abstract (en)
[origin: WO2009150347A1] The invention relates to a method for setting up an on-demand video service program guide based on the mood of the user, said method provided to: develop profiles matching the available on-demand videos and mood parameter values; ask the user to define the mood thereof by selecting mood parameters and attributing values for the selected parameters; use the developed profiles to select a list of videos (7) corresponding to the parameter values defining the mood of the user; and set up a program guide related to the list of selected videos (7). The invention also relates to a system for setting up an on-demand video service program guide.
