Abstract (en)  
A vacuum cleaner accessory tool (10) configured for use with a vacuum cleaner. The accessory tool (10) includes a nozzle body (14) that defines a chamber (20). The accessory tool (10) further includes a first resilient flexible blade (90) that extends from the nozzle body (14), a second resilient flexible blade (92) that extends from the nozzle body (14), and a third resilient flexible blade (94) that extends from the nozzle body (14). A first elongated inlet aperture (66) extends through the nozzle body (14) directly between the first blade (90) and the second blade (92) and the first inlet aperture (66) allows air to pass therethrough and into the chamber (20). A second elongated inlet aperture (68) extends through the nozzle body (14) directly between the second blade (92) and the third blade (94) and the second inlet aperture (68) allows air to pass therethrough and into the chamber (20).
