Abstract (en)

[origin: EP2289818A1] A thin display apparatus is packed in a package box. A reinforced plate is attached to the display apparatus. The reinforced plate has a first end portion, a second end portion, a middle bent portion and a buffer member fixed to the first end portion. The first and second portions face each other with the bent portion located therebetween and connected thereto. The reinforced plate is attached to the display apparatus so that the bent portion is set on a top portion of the display apparatus at a top side, the buffer member is positioned at a front side of the display apparatus as facing a display screen and the second portion is positioned at a rear side of the display apparatus. A cushion member is attached to the reinforced plate so that the cushion member is set on the bent portion set on the top portion.
