Abstract (en)

Each of the guide rails (3) has a lengthwise positive fastening unit (32, 34) for the subassemblies mounted in the guide rail, and the cassette (1) has end walls (11) on both sides, and each of the end walls has a fastening block (12), entering the main niche (31) of the guide rail (31) with a clearance enabling it to be freely moved, in addition in the upper part of the guide rail a snap fastener in the form of a catch (42), cooperating with the catch surface (13) in the fastening block (12) of the cassette end wall (11) is installed. The lengthwise positive fastening unit is a fastening channel (32), advantageously formed from two projections (33) with the angle-section contour, situated in the main niche (31), intended for fasteners, in particular nuts (81), fastening the subassemblies placed inside the guide rail (3) in this guide rail.
