Abstract (en)

[origin: EP2290668A1] The device has an actuating unit (10) to actuate the functions and a transfer element (11), where a plunger (20) is arranged between the actuating unit and the transfer element. The plunger has a contact surface (21). The actuation is carried forward on the transfer element during interposition of the contact surface by the plunger. A guiding element (30) is provided, in which the plunger is guided through a positive guide (35). The actuating unit is made of soft plastic in certain areas.
