Abstract (en)
[origin: WO2009157025A1] A system is described for automatically closing and opening (1) comprising at least one delivering assembly (5) for pressurised infusion water, such filter-holder chamber (3) and such delivering assembly (5) mutually cooperating through at least one automatic closing and opening mechanism (4) driven to be opened and/or closed, by interposing at least one closing and opening kinematism (7), by at least one control motor (9).
