Abstract (en)
The installation (1) has a cutting assembly (2) cutting sleeves (31) and traversed by a descending path (CD) via which a sheath (3) passes. The assembly has a chassis (100) carrying a gear motor (101) and lateral guide rails (141) receiving a gripping slide (130) and a blade holder slide (110). Upstream and downstream support bars (121a, 121b) define a cutting interval (IC) from a side of the path. The blade holder slide carries cutting blades (150) that has cutting edges formed of saw teeth and are arranged in the interval of gripping blades (131a, 131b) supported against the bars. The support bars are made of flexible material such as rubber.

Abstract (fr)
Installation de pose de manchons étirables comprenant une installation de coupe (2) de manchons (31) traversée par le chemin de passage descendant (CD) de la gaine (3), ayant un châssis (100) portant un moyen d'entraînement (101) avec des rails (141) recevant un chariot de pincement (130) et un chariot porte-lame (110). D'un côté du chemin de passage (CD), une barre amont (121a) et une barre aval (121b), définissent entre elles un intervalle de coupe (IC). Une lame de coupe (150) avec une arête de coupe (151) en dents de scie (152) du chariot porte-lame (110) vient dans l'intervalle (IC) des lames de pincement (131a, 131b) appliquées contre les lames d'appui (121a, 121 b).
