Abstract (en)
[origin: EP1749756A2] A polygonal shaped container (10,110,210,310,410,510) is provided which includes a wrapper surrounding a food product. The shape of the container is defined by either a frame containing a food product or rigid material incorporated with the wrapper. Access to contents in the container is provided by withdrawing a resealable sealing layer (20,120,220a,220b,320) sealed to the top or side surface of the container (10,110,210,310,410,510) and withdrawing the sealing layer from the container or by pivoting a rigid lid (423) away from the top of the container.
