Abstract (en)
[origin: EP2292532A2] The invention relates to a dispenser for dispensing sheets, comprising: a support member for supporting a stack of sheets; a housing for housing the stack of sheets, the housing being slidably mounted over the support, the support being inserted in the housing through a first opening at a first sidewall of the housing; the housing comprising: a second opening at a second sidewall opposite from the first opening for removing sheets from the stack; and a third opening at a third sidewall through which the stack of sheets can be inserted in the housing. By providing a third opening in a third sidewall through which the stack of sheets can be inserted in the housing, the stack of sheets can be inserted in the dispenser without requiring the housing to be fully removed from the support member.
