Abstract (en)
[origin: CA2709110A1] A riding floor has an arrangement which is laid on an underground (10) and comprises ground preparation elements (12) which are substantially in the form of plates and are arranged next to one another, and a footing layer (18) on that side of the arrangement of ground preparation elements (12) which is facing away from the subfloor (10) . Further, there is provided on that side of the ground preparation elements (12) facing the footing layer (18) a plurality of tufts of bristles (14), with the length of the tufts of bristles (14) being selected such that the tufts of bristles do not project out of the footing layer (18). Such a riding floor is specially suited for Western riding.
