Abstract (en)

[origin: EP2292864A2] The covering has conical sections (17) provided on a lower side of a plastic tile (10), adjacent to a lower edge (12). The conical sections have a snap-in head provided on the lower side, and engaging elements are formed by a bar. A profile seal is detachably fastened to the lower edge. A connecting element is designed as a C-guide rail having an opening in a base. The C-guide rail is fixable on an upper side (15) of the plastic tile by a screw. The C-guide rail resiliently holds the snap-in head. The tile is made of thermoplastic material filled with inorganic material.
