Abstract (en)

[origin: EP2292865A2] The window has an end cap (3) covering a front face of a cover plate mounted on a casement frame. The end cap has a receiving stage (13) comprising a supporting surface (14) and a covering surface (15), where the end cap is mounted on the cover plate by a snap-in connection (7). The supporting surface is arranged in the rear side of the cover plate, and the covering surface is arranged opposite the front face of the cover plate, where the height of the receiving stage is larger than the thickness of the cover plate.
