Abstract (en)
[origin: EP2292906A1] The present invention has an object to provide a motorcycle configured to efficiently separate alcohol from blow-by gas. The motorcycle includes an engine (3), an intake path (35), an air cleaner (42), a catch tank (60), a first hosepipe (71), and a second hosepipe (72). The intake path (35) is connected to the engine (3). The air cleaner (42) is disposed at the intake path (35) and is aligned with the engine (3) in a longitudinal direction. The catch tank (60) is disposed in the surroundings of the air cleaner (42). The first hosepipe (71) connects the inside of the engine (3) and the inside of the catch tank (60). The second hosepipe (72) connects the inside of the catch tank (60) and the intake path (35).
