Abstract (en)
Street light, particularly a high power LED light, where a multi-sided body (7), ranging from 4 to 12 sides, is used to house LED lights (6) and then connected to PCB inside a main chassis, connected by a heat ring. This type of high power LED street light provides a simple design for lost-cost production of street lighting that is long-lasting and results in low maintenance cost to the use and care of such street lighting.
