Abstract (en)
[origin: EP2293334A2] A display apparatus (1) is disclosed. The display apparatus (1) includes a transistor (8) formed on a substrate (2); an interlayer insulator (9) formed on the transistor (8); a pixel electrode (13) formed on the interlayer insulator (9); a first partition (10) located above a contact hole (17x) which penetrates the interlayer insulator (9); and a second partition which intersects with the first partition (10), or which is located on a straight line intersecting with the first partition (10), and which brings a width value of the pixel electrode (13) to a predetermined value. Also disclosed is a method of manufacturing a display apparatus.
