Abstract (en)

The heat exchanger (10) has a heating register (1) arranged in a frame (11) and provided with two contact plates (6, 6'). An insulation profile (16) is provided on the heating register in a potential-free arrangement, and is made of silicone. Rib elements contact heat conductive plates at the heating register. A covering element covers the contact plates and power supply elements e.g. cable and conductor rails, and is made of plastic. A seal e.g. rubber profile or foam profile, is provided between the covering element and the heat exchanger.

Abstract (de)

Die Erfindung betrifft einen Wärmeübertrager (10), insbesondere einen elektrischen Zuheizer für ein Kraftfahrzeug, mit zumindest einem zumindest ein Heizelement (3) und zumindest zwei Kontaktbleche (6, 6') aufweisenden Heizregister (1), wobei das zumindest eine Heizregister (1) in einem Rahmen (11) angeordnet ist, wobei auf dem zumindest einen Heizregister (1) ein Isolierungsprofil (16) in potentialfreier Anordnung vorgesehen ist
