Abstract (en)
[origin: CA2718362A1] The invention relates to a stripe line for high-frequency signals, having a signal conductor (10) and at least one earth conductor (12), both being disposed on a substrate (14) made from an electrically insulating material. According to the invention at least one hole (20) is made in the substrate (14), wherein said hole (20) is at least partially filled with an electrically conducting material (22), wherein an electrically conducting connection is made from at least one earth conductor (12) to the electrically conducting material (22).
