Abstract (en)

[origin: EP2295120A1] The ski (1) comprises a climbing or repelling assistance (6,6',6''), which is attached in the middle section corresponding to the ski longitudinal direction, which has a brush-like or a joint-profile-like rear floating inhibitor (4) and a dimension-stable carrying element (5). The carrying element is movably inserted into a recess (7) in the vertical direction to the surface area of the recess.
