Abstract (en)

[origin: EP2295212A1] The fence module comprises a superstructure (9) overlapping the machine table (3) at sections presenting workpiece extending along longitudinal direction. The guided portions include a guided carriage inserted in a guide groove (14a) on machine table side. The guided carriage comprises number of ball bearings or roller bearings that are movable on rollers in release position. The distance between number of ball or roller bearings contacted with surface in groove is altered while maintaining guide carriage between roll-off and withdrawal positions. An independent claim is included for woodworking machine.
